

Careers in Computing

'Unlike many other vocational courses where aspects of employability might be injected into projects, all of the work our students complete has been developed with our employer sponsors which include Intel Security, and Cisco. The best thing about this job is seeing my students develop into adults. They gain an understanding of where their passions lie and instil a sense of direction as they turn into the skilled, work-ready employees of tomorrow'.

Alan Bailey, Head of Computing at Bucks UTC

- **3D Modeller**
- **Animator**
- **Computer Analyst**
- **Computer Forensics**
- **Customer Services**
