

# Computing

## Why study Computing at Bucks UTC?

In our Computing programme you will learn all about the diversity and complexity of the Computing Industry. We deliver a tailored curriculum which ensures you leave with the knowledge and qualifications that the industry really want. In gaining your qualifications you can learn all about:

- **Digital Media Production**
- **Business Enterprise**
- **Creating Systems to Manage Information**
- **Film Production**
- **Principals of Computer Science**
- **Software and Hardware Support**
- **Use of Social Media and Business-Related Applications**
- **CISCO Essentials, CISCO CCNA and CCNP**
- **Microsoft Technical Associate (and higher) Qualifications**
- **IT System Security and Encryption**

In studying this wide variety of subject matters, you will be provided with an enviable, broad range of options for the future whilst you will also have opportunities to work on projects and gain work placements for a spectrum of cutting-edge employers. We don't only bring learning into the classroom but we take our students on numerous trips allowing them to gain insight into their industry's workplaces.

*'Teaching and outcomes are strong in vocational subjects in both Key Stage 4 and 5'. 'Pupils are very clear about the best approaches to take to develop the skills they need. In programming classes, the teacher has expertly made good use of some pupils' higher level skills gained from their hobbies to help other less confident pupils make progress'.*
